

CLOUD BUSINESS APPLICATIONS

OFFERS YOU A SINGLE WORK ENVIRONMENT,
BRINGING TOGETHER ALL OF
YOUR APPLICATIONS.

Your management and work tools are integrated in your Cloud solution and are available from any desktop or mobile device. Because we know that each IT environment is unique, we propose a tailor-made solution, in response to your own professional use.

We currently have about 20 business solutions in our Cloud as well as dozens of specific developments.

If your application is in our current portfolio, we will give you easy access to it.

Here is a non-exhaustive list of applications present in the Systemat data centres:

Our staff are organised to provide state-of-the-art expertise that is specific to your business. We also surround ourselves with a variety of partners in order to constantly develop our portfolio of applications.

If your application is not yet present in our data centres, we can «Cloudify» it, in other words test it in order to validate that it works properly in Cloud mode, then ensure the completeness of its migration to our infrastructure.

Real estate	Omnicasa
Distribution	Systemix

MIGRATION OF YOUR DATA SYSTEMS TO OUR DATA CENTRE

As an IT solutions integrator, our mission is not only to offer you a complete solution, but also, and above all, to ensure its proper implementation.

We use a migration method that relies on our know-how and on the best technologies available on the market. By following a detailed deployment procedure and offering you an adapted, progressive approach, we guarantee the proper execution of your project. We provide you with on-boarding scenarios as well as specific documentation, and we offer training and briefings for your staff.

Thanks to a dedicated platform that is specially designed to meet your needs, you get a fully integrated solution, and you no longer have to worry about your business applications or about the administration of your servers.

A SINGLE USER EXPERIENCE

Your business tools, anywhere and any time

Approve an invoice, make a payment, track sales... You do all this from any workstation or from any location.

Same use, wherever you are

The technology we have chosen enables you to use your applications in the same way at the office and on your tablet.

High performance, even on the WiFi network

Our technology publishes your files or applications without transferring them. Our goal? Unmatched performance, even with a WiFi connection!

MAIN BENEFITS

All your software via a single point of access

Connected to your Cloud Desktop, you get instant access to your Windows or iOS desktop and to all your business applications.

More flexibility in when you work

Your staff can work just as easily at home or at any other site. You can also very easily add or delete additional staff.

Secure tools, data and back-ups

You benefit from guaranteed availability of the best antivirus software on the market and our own firewall. We perform back-ups in order to guarantee your long-term viability.

Integrated maintenance and support

We centralise the maintenance of servers and software (as a function of the service level), and we offer you access to Assist-Line for all your IT questions.

Uniform management of your applications

You retain control of the maintenance and specific configurations of your application, while getting all the Cloud benefits.

Cut your investments

You control your budget, and you pay only a fixed sum per user as a function of your consumption. You only have to worry about related expenses, such as the maintenance of your infrastructure or your back-ups.

GREEN-IT

- Opting for the Cloud is an environmentally responsible thing to do. Virtualising servers and sharing hardware generate economies of scale in terms of the electricity consumption needed to power the servers and their air conditioning: Think about it!

ENTERPRISE MOBILITY MANAGEMENT

- The Cloud greatly facilitates secure access to your company's data from mobile devices of all types: smartphones, tablets, etc. The benefit for you is a gain in productivity and greater convenience for users. This still obviously raises the matter of managing these mobile devices correctly, particularly from the security standpoint. Systemat will be your partner.

WHAT WILL YOU PAY FOR ?

- A Cloud hosting charge (recurring fee)
- Licence fees (recurring fee)
- The installation and migration service charge (fixed start-up cost)
- Cloud User Support provides unlimited Incident Management by telephone or on site and handles Change Management at a very preferential rate.

CLOUD BUSINESS APPLICATIONS

CLOUD BUSINESS APPS BY SYSTEMAT	✓ Included	● Optional	N/A Not available
