

CLOUD DESKTOP

TRANSFORMS ANY COMPUTER INTO YOUR PERSONAL WORKSTATION

- **Is your infrastructure showing signs of fatigue ?**
- **How can you be sure of always having high-performance, reliable computer systems, without excessive constraints ?**
- **How can you meet your users' needs and increase their work flexibility ?**
- **How can you keep up with technological changes, without the risk of drowning in details ?**
- **How can you stay at the forefront of technology, without putting your budget in peril ?**

From your office or home computer, your laptop or your tablet, regardless of whether it runs on Windows, iOS or Android, you can access your desktop, your applications and your files with just a simple Internet connection.

Cloud Desktop also prepares your desktop to integrate business applications such as your CRM, ERP, etc.

SYSTEMAT CLOUD SERVICES

Systemat is not just a supplier of information systems, we are also, and above all, **an integrator of Cloud solutions.**

The implementation and migration of your systems and/or data are our core business, and we are recognised by our clients for our comprehensive service offer.

HOW DO WE WORK ?

Migration and implementation services

In view of our future collaboration, our teams will perform an analysis of your needs and conduct an audit of your current infrastructure in order to propose a complete solution and avoid any surprises. They will present the audit results, the implementation and migration plan as well as the training of your staff in a document titled «Scope of Work», which will be appended to our final offer to you.

Our offer is therefore a **complete solution** that is **adaptable** as a function of your budget, in order to meet your specific needs.

Support services

If you have any questions or issues, we are at your disposal locally in order to provide all necessary support. As a function of the selected options, we can offer you extensive services up to and including support for your users and for their different workstations.

CLOUD DESKTOP

MAIN BENEFITS

Your computer, anywhere and any time

Your programs and files are always available, wherever you are and whenever you need them.

Your software, as usual

With Cloud Desktop, you get instant access to your Windows desktop and your applications (E-mails, documents, files, specific business applications, etc.).

Performance and fluidity in your work

We use the latest publication techniques in order to ensure high-performance use for you and to keep response times to a strict minimum, whatever the workstation or your place of use.

Flexibility in when you work

Your staff can work just as easily at home as in the office. They just need an Internet connection, and all of their applications will be available.

Secure data and back-ups

You will get the best antivirus software on the market, our own firewall as well as daily back-ups.

Lower investments

You pay only a fixed sum per user each month, as a function of your consumption.

GREEN-IT

- Opting for the Cloud is an environmentally responsible thing to do. Virtualising servers and sharing hardware generate economies of scale in terms of the electricity consumption needed to power the servers and their air conditioning: Think about it!

ENTERPRISE MOBILITY MANAGEMENT

- The Cloud greatly facilitates secure access to your company's data from mobile devices of all types: smartphones, tablets, etc. The benefit for you is a gain in productivity and greater convenience for users. This still obviously raises the matter of managing these mobile devices correctly, particularly from the security standpoint. Systemat will be your partner.

WHAT WILL YOU PAY FOR ?

- A Cloud hosting charge (recurring fee)
- Licence fees (recurring fee)
- The installation and migration service charge (fixed start-up cost)
- Cloud User Support provides unlimited Incident Management by telephone or on site and handles Change Management at a very preferential rate.

3 DIFFERENT PACKAGES TO MEET YOUR EXPECTATIONS
